About Me

Hi there! My name is Raghad and I'm a full stack developer. I've always been passionate about building websites, and I love using my skills to help businesses and individuals share their message with the world. I graduated with a degree in Software Engineering from BAU University and have worked with a variety of clients in different industries. If you're interested in learning more about my work or collaborating on a project, feel free to get in touch!

Testimonials

"Working with Raghad was a fantastic experience. her technical skills and knowledge of various programming languages and frameworks were evident from the start. Raghad was able to translate our requirements into a functional and efficient web application. she was always available to answer our questions and provide guidance, making sure that the project was delivered on time and within budget. I highly recommend Raghad for any web development needs."

Someone
